LABORATORY/PATHOLOGY TESTING: ATTENTION PATIENTS

- Patients should be aware of their plan offerings and coverage. Through Insurance Eligibility data available at the time of your procedure, DAG works to keep up with most plans and their coverage for lab and special testing, but due to the number of plans and special networks we may not have the most recent information. *Please ask when scheduling, at the front desk and ask our billing department (ext. 6300) if you are unsure about your insurance plans coverage for lab or special tests and consult your health insurance plan. The back of your insurance card is a good resource for patient care contact information.*
- T-Spot for TB testing is done through OXFORD Labs/Quest – Blue Cross Blue Shield is out of network for Oxford Labs/Quest and will not cover the T-Spot TB Test.
- Immunostaining testing is done through KDL as needed. Full or partial coverage may vary by Patient's insurance plan(s).
- Also, important to remember is that pending your insurance plan(s) deductibles, the portion the patient/enrollee has to pay, co-insurance and co-payments varies by plan and varies by what type of testing is or is not included or covered. ** Please note, a Medicare Replacement/Advantage plan goes thru the Insurance Company-- not CMS Medicare --and has different coverage and allowables than traditional Medicare.*
